

About Us

Throughout the communities we serve, Post Acute Medical offers hope and acts as a catalyst for achieving an optimal quality of life by:

- Focusing on putting the patient first and providing quality care for medically complex (LTACH) and rehabilitation patients
- Providing comprehensive, individualized treatment including physical therapy, occupational therapy, speech therapy, and specialty physicians and nurses
- Returning each patient to their highest possible functional status

Patient Reviews

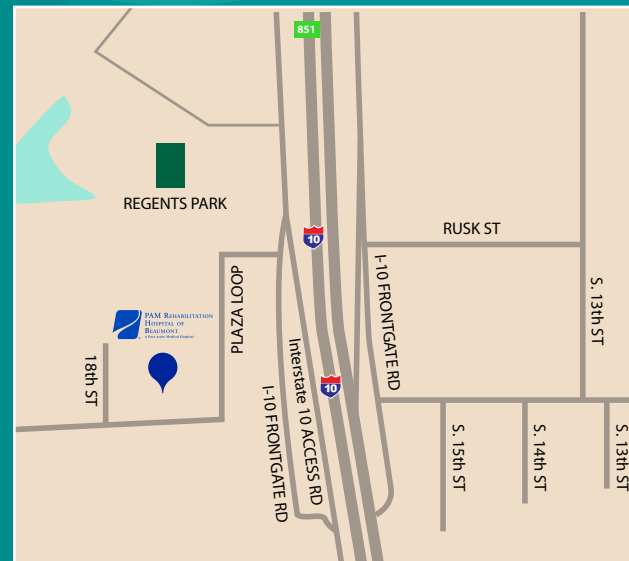

"Your staff did a wonderful job working with Dad. All nurses and support staff were friendly and always had Dad's best interest in mind. The therapy team was awesome! Their energy and personality helped lift Dad when he was fatigued or having a bad day. We appreciate the training given to family and caregivers. Keep up the great work!"

We Care.

Patient Success Story – Mathew

At the young age of 23, Matthew Lemke was diagnosed with a malformation that was pressing on his cerebellum and brainstem, requiring that he immediately undergo surgery. Following surgery, Matthew was unable to move and was diagnosed with quadriplegia.

Following an extended stay in the intensive care unit, Matthew was admitted to PAM Rehabilitation Hospital of Victoria for physical and occupational therapy and continued medical management. When he arrived, he was in a wheelchair; lacked fine motor skills, balance, and coordination; and was extremely weak, requiring maximum assistance to sit up in bed. By the time Matthew was discharged home, he had made exceptional gains in his functional mobility, was able to perform activities of daily living independently, and was able to walk out of the facility without the use of an assistive device.

Matthew worked very hard in therapy and says, "Although sometimes I didn't know if I could do it or not, the entire staff was always there with positive reinforcement and encouragement to keep me going! It was truly an A+++ experience!"

"Thank you for the very best care! South Texas is lucky to have such a wonderful place for those who need therapy and a little extra care."
